

Re-Strainer (In-Line-Strainer) 200 µm – Sterile

Specification

Catalog No.:	43-75200-40
Strainer color	brown-transparent
Lot No. / EXP	on bag, top
Quantity	5 x 4 devices, sterile (radiation)
Mesh material	PET precision woven mono-filaments
Housing material	PP
Screw cap	Luer-lock-port for syringe or tube connection
Outlet	Luer-lock-port
Stability	Isopropanol, cell lysis buffers
Storage	Room Temperature

Component Description

The Re-Strainer is a filtration device for high volumes of liquid to exclude or concentrate particles from liquids with the possibility of particle recovery. The 6 ml recovery reservoir can be accessed by unscrewing the cap. The Re-Strainer has two female luer-lock-ports.

These ports can be used to connect several Re-Strainer to a filter cascade (male to male luer-lock connector) or integrate the Re-Strainer as an in-line-strainer via luer-lock tube adaptor

The mesh is an integrated part of the housing to give the device maximum mechanical stability.

Warning and Limitations

The product is for research and development only, not for diagnostic or therapeutic use.
